

Clue 6a

Knit rows 189 – 210 once (= 22 rows). Symbols between darker vertical lines are knit a total of 23 times. After you have knit Clue 6a, you should have 437 stitches on the needle.

Variation: If you omitted clue 5, you have now 245 stitches on the needle. You must decrease 2 stitches on the row 189. Decrease these two excess stitches knitting two stitches together instead of chart's one knit stitch after two edge stitches at the beginning of the row and before two edge stitches at the end of the row. Continue following a chart. Symbols between darker vertical lines are knit a total of 16 times instead of 23. After you have finished Clue 6a, there will be 311 stitches on the needle.
